

Bugzilla

Bug tracking that can grow with your organization

- Used by **thousands of organizations** around the world
- Proven enterprise-level **scalability**
- Fine-grained **permissions**
- Extensive **customizability**
- Google-like **search** for the casual user; extensive query builder for the advanced user
- XMLRPC and email **APIs**
- **Localizable**, 8 languages currently available
- Support for **multiple database engines** (currently MySQL and Postgres; Oracle support landing soon!)
- **Track time** spent working on bugs
- Extensive **reporting** tools, both built-in and third-party
- Many third-party **add-ons** and integration with other applications

Anyone can help Bugzilla become even better!

- **Good with words?**
Documentation for end users and admins is always in need of updating
- **Web designer?**
Bugzilla's UI always needs love
- **Good at breaking things?**
QA testing of Bugzilla releases helps make sure it all works!
- **Already know how Bugzilla works?**
Helping new users get up to speed helps support the community!
- **Got language skills?**
Translate Bugzilla or its documentation to other languages!
- **Visit our website and click on "Contribute!" to learn more!**
